DETAILED ACTION***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Feb. 5, 2003 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 73-76 are rejected under 35 U.S.C. 102(e) as being anticipated by Hayashi (6,426,790).

Hayashi discloses in Fig. 1 and 3B a substrate holding system comprising a holding table for holding table (12) for holding a substrate; a protrusion (87) on the holding table, the protrusion having a constant relative position with respect to a plurality of alignment marks (col. 11, lines 25-38) on the substrate. Hayashi also discloses an exposure apparatus and a device manufacturing method comprising a substrate holding system discussed above (see Fig. 1).

Allowable Subject Matter

Claims 2,3,5,7,11,15,16,18,20,25,34-42 and 53-72 are allowed.

None of the prior art of record teaches or discloses a substrate attracting holder or method comprising supporting a substrate by use of protrusion with a position of an alignment mark to be used to processing the substrate or a position with respect to which an alignment mark is to be produced wherein the substrate is supported so the alignment mark is placed above the protrusion or place at a central portion in relation to disposition of the protrusion.

None of the prior art of record teaches or discloses a conveying system comprising a cassette for accommodating a plurality of chucks being different with respect to disposition of protrusions for supporting a substrate; a conveyance robot selecting a chuck based on the basis of information related to a processing region on the substrate.

Conclusion
